PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

Session Procedures Report (S/NF/SK)

-----  
PROJECT NUMBER: 8713                      SESSION NUMBER: 3  
DATE OF SESSION: 22 OCT 87              TARGET COUNTRY:  
REFERENCE:                                  MISSION STATUS:  
TECHNIQUE UTILIZED: CRV                  SOURCE IDENTIFIER: 018  
-----

1. (S/NF/SK) Monitor Tasking: Determine the nature and extent of the present activity associated with the given coordinates.

2. (S/NF/SK) Source Tasking: This session, conducted primarily in Stage 6, began in Stage 4 with an exploration of the "present activity".

3. (S/NF/SK) Summary: The Viewer's summary and diagrams are attached. Based upon other viewer data and analysis, the "large structure which is somehow in the water but sitting on land" represents an incorrect decoding of ice. *Excellent observation confirm via Stage 7 with all elements.*

4. (S/NF/SK) Comments: This monitor is of the opinion that current events (non-target) may have "leaked" into the session (cf. AOL of "oil platform"); 018 is prone to this type of behavior

# memorandum

DATE: 23 October, 1987

REPLY TO  
ATTN OF: DT-S

SUBJECT: SESSION SUMMARY (C/SS)

TO: DT-S (ATTN: [REDACTED])

1. (S-SS) Statistics: Viewer: 018  
Session date: 22 OCT 87

2. (S-SS) This session was a follow-up to the session conducted on 20 OCT 87. The session was worked almost entirely in stages 4 and 6 (See Stage 6 diagram on page 1A). Impressions gained from the targeted site include:

a. Activity B appeared as a low, grey prefab building in which there was some activity, consisting mainly of male voices. One female voice was perceived, laughing.

b. Activity A was perceived as having little or no activity. There was, in fact, an impression that "Activity A" did not really exist.

c. The "Site" was the subject of most of the session. It seems to consist of a large structure which is somehow in water, but sitting on the ground. An overall view of the area gave the impression of a structure sitting on a flat area of land which is under a shallow layer of water. There seems to be some land attached to the structure, but I am not certain. A cross section of the structure (see sketches, pages 5 and 18), going from top to bottom, gives the following impressions:

- 1) The top layer contains people who are somehow engaged in work with a "console" (see page 4).
- 2) Directly below that is an empty area of "lines" which either form into open framework or empty compartments.
- 3) Directly below that is the surface of the land/water which surrounds the structure. Below that point, there is a large, black space which is further subdivided into three parts:
  - a) An open, empty space which seems to have pipes sticking up into it from the layers below (See sketches, page 11).
  - b) A thick layer of relatively clear liquid (Shown as "top part" in sketch on page 6A).
  - c) A much larger layer of black, viscous (almost

*Summary.*

solid) liquid on the bottom.

- 4) At the bottom of the structure, there is a thin layer of metal separating the structure from the ground below.
- 5) Below the structure is solid ground which feels very wet.
- 6) On the sides of the structure, there is a liquid which is perceived as probably being salt water (smells salty, but doesn't taste that way... Tastes stale and old.).
